

Eli Gonzalez

Vancouver, Canada | +1 (236) 777-2399 | eligoze75@gmail.com | [LinkedIn](#) | [Portfolio](#)

Data scientist with 7+ years delivering measurable impact across fintech, growth, and consumer businesses, mostly at high growth startups. Track record of owning problems end to end, from framing to shipping, and moving fast without sacrificing rigor. Comfortable with ambiguity, wearing multiple hats, and mentoring others along the way. Also builds hands-on with AI, having designed and shipped a GenAI product end to end. Master of Data Science, University of British Columbia.

WORK EXPERIENCE

Senior Data Scientist — Kueski (Largest BNPL Fintech in Mexico)

Mar 2022 – Dec 2025

- Owned fraud detection ML models end to end for a lending platform evaluating around 25,000 applications daily, redesigning the fraud definition and improving catch rate from 40% to 70%, while increasing savings 16% and raising approval rate from 90% to 92%.
- Built real-time production models and reusable feature pipelines (Python, SQL, PySpark, XGBoost, PyTorch), combining graph-based network analysis and unsupervised methods to catch patterns others missed.
- Partnered across Credit Risk, Product, and Engineering, and mentored junior data scientists on production ML practices.

Growth Data Scientist — The Heineken Company

May 2021 – Mar 2022

- Designed and led an experiment testing a new subscription-based commercial model, delivering a 16% revenue uplift, and built attrition and churn models to support retention strategy.
- Shipped an NLP pipeline that cut customer feedback review time from two weeks to under two minutes.

Growth Data Scientist — Rappi (Unicorn On-Demand Delivery Marketplace)

Nov 2020 – May 2021

- Owned marketing attribution and forecasting end to end for a fast-moving marketplace, and built a model optimizing the probability of purchase given a coupon while keeping spend under a fixed budget threshold.

Founder & AI Engineer — Brewo — AI-Powered Newsletter Platform for LATAM

2026 – Present

- Independently scoped, built, and shipped a GenAI product end to end, designing a multi-agent LLM pipeline (LangChain, Hugging Face) from idea to live product.

SELECTED PROJECTS

Marketing Content Copilot — UBC Capstone, built for SquareOne

- Led a team of data scientists to build and ship an Explainable ML + RAG pipeline turning conversion analytics into content recommendations for marketing teams.

Megumi — Open-Source Python Package

- Published a feature-selection library for ML pipelines on PyPI with documentation, tests, and a scikit-learn-compatible API.

ADDITIONAL EXPERIENCE

Technical Account Manager — Rappi (Apr 2020 – Nov 2020)

Founder & Operator — MunchGo, Multi-Brand Ghost Kitchen (Feb 2023 – Jan 2024)

Data Scientist Sales Engineer — Insaite (Jan 2020 – Apr 2020) | Junior Data Scientist — Axity (Sep 2019 – Jan 2020)

EDUCATION

Master of Data Science — University of British Columbia, Vancouver, BC (2025 – 2026)

Certification, Data Science & Machine Learning — Massachusetts Institute of Technology (2022)

Bachelor of Actuarial Sciences — Universidad Nacional Autónoma de México, Mexico City (2016 – 2020)

SKILLS

Impact & Delivery: End-to-End Ownership, Fast-Paced & Ambiguous Environments, Cross-Functional Collaboration, Mentoring

Data Science & ML: Python, SQL, PySpark, R, XGBoost, PyTorch, Scikit-learn, Statistical Modeling, Experimentation & Causal Inference

Tools & Platforms: Power BI, Metabase, Databricks, AWS, Git

AI/GenAI (working knowledge): LLMs, RAG, AI Agents, LangChain, Prompt Engineering
